

IEEE MASS 2013 - Call for Demonstrations

The 10th IEEE International Conference on Mobile Ad-hoc and Sensor Systems
October 14-16, 2013. Hangzhou, China

IEEE MASS 2013 will feature a demo session that provides a forum for wireless ad-hoc and sensor network researchers and developers from academia, industry, and government to interact and share latest research results. Towards this goal, MASS seeks participations from all three entities. Demonstrations offer the opportunity to present significant work in progress or research that is best communicated in an interactive or graphical format.

Demo submissions are welcome in all aspects of wireless ad-hoc and sensor networks, including algorithms, protocols, applications, hardware and tools, new research prototypes, testbeds, etc. Authors are asked to submit a 2-page abstract that describes the project, highlights the main contributions, and details what will be shown. Please refer to the Submission Instructions below for more detail.

Important Dates:

Demonstration registration	July 12, 2013
Abstract submission	July 19, 2013
Acceptance notifications	July 27, 2013

Submission Link:

Submission Instructions:

Demonstration abstracts should be no more than 2 pages (US letter size 8.5 × 11 inches), with the same formatting guideline as outlined in [Call For Papers](#). All abstracts must be in PDF format and submitted electronically through [EDAS](#). Authors can include up to one additional page for listing any specific demonstration requirement (e.g., space, reserved wireless channels, power supply needs, etc.), and the organizers will earnestly look into the arrangement.

Accepted demos are allowed to display a poster for presentation. Additional details on the poster dimensions will follow after the acceptance notification.
